Dividend Policy

St Barbara considers the payment of dividends at each financial reporting date. Dividends are one component of capital management, which seeks to maximise the value of the Company. Dividends combine with share price appreciation as part of total shareholder return.

The amount of dividend to be declared at any time will be influenced by underlying financial performance and cash flow, commodity price expectations, balance sheet and treasury risk management, working capital needs and competing internal and external investment opportunities necessary for renewal and future growth. To the extent the Company has franking credits, it will look at distributing them to shareholders.

A summary of previous dividends is published at stbarbara.com.au/investors/dividend.

Dividend Reinvestment Plan (DRP)

The DRP announced on 7 August 2017 will apply to the dividend announced today. The DRP allows eligible shareholders to nominate to re-invest part or all of their dividend into St Barbara shares. The DRP provides that a discount may be applied to shares issued under the DRP at the discretion of the Company. A 1.0% discount to the 5-day volume weighted average price will apply to allotments made under the DRP for the 2020 final dividend announced today. A copy of the DRP Rules is available at stbarbara.com.au/investors/dividend.

Shareholders who previously elected to participate in the DRP will automatically participate in the DRP for this dividend, unless they change their election prior to the DRP Election Date.

Participation in the DRP is not automatic, and shareholders need to respond to correspondence from the Share Registry or elect to participate online via www.investorcentre.com/au before 5 pm AEST on Wednesday 9 September 2020.
